

# Monitoring and Evaluation

Frequent monitoring and evaluation of homestay placements will be conducted using the following methods:

- Periodic survey of homestay students and staff
- Periodic phone calls to homestay hosts
- Informal meetings with students at the college
- Discussions with teachers of the homestay students
- Regular home visits

Feedbacks from homestay families and students will be used to improve the homestay program. The feedbacks will be collected using informal techniques such as semi-structured interviews with home stay students and hosts.

Based on the feedbacks, program materials and databases will be updated and any reported problems will be investigated and rectified.
